FCU Valves & Actuators

FCU valves allow greater control of hot or chilled water flow

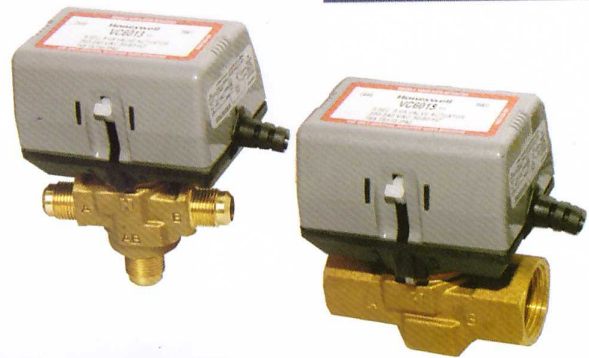

- 2-way or 3-way valve body
- Wide variety of pipe connections viz; BSPP, BSPT, Flare, Sweat, NPT, etc.
- Controlled by SPST, SPDT, floating and modulating controllers
- High close off pressure
- Detachable actuators eases installation and maintenance

VC series

2 & 3-way valves

VC6013/4013

V4 series

2 & 3-way valves

V4044/43

- 2-way or 3-way valve body
- Wide variety of pipe connections viz; BSPP, BSPT and Flare (suitable for 5/8 inch OD)
- Fail-safe spring-return actuators works on SPST control

Fan coil control

Fan Coil Units (FCU) are used for zoning control in centrally air-conditioned building.
